ENTRY KIOSK

Because of COVID-19, health screenings are the new norm for entering many types of buildings. For communities like ours, this is the first line of defense for keeping our campus infection-free. Through proper screening, we determine if people have a temperature, symptoms of illness, or known exposure to sick people.

Traditional paper and pen screening processes are cumbersome, time-consuming, and not fully effective.

You can help prevent infection in our community by supporting ADF's investment in a new Health Entry Screening Program. Using an advanced automated kiosk with facial recognition and biometric capabilities, our program will make it safer for the people living, working, and visiting our community.

PROVEN IMPACT

- ✓ Thorough screening questions
- ✓ Reliable temperature checks with no contact
- ✓ Facial recognition to authorize entry
- ✓ Simpler registration for families and guests
- ✓ Electronic record of each screening

HOW PEOPLE BENEFIT

- ✓ Faster building entry
- ✓ Reduced infection risk since person-to-person contact is eliminated
- ✓ Increased safety since people who pose health risks will not remain on campus
- ✓ Improved contact tracing through automated data collection

STRONGER ★ SMARTER ★ SAFER

“By supporting ADF's health entry screening program, you'll protect the people who live and work here by helping to keep COVID-19 and other viruses off our campus.”

Col Paul Bricker, USA (Ret.), Chief Operating Officer
Knollwood Military Life Plan Community
